Objective

Dedicated to ongoing growth in software development, aiming to innovate and craft user-centric solutions by harnessing expertise in diverse technologies and frameworks.

Projects

1. **On Blood For All** — *(blood donation site)*
   Project duration — 7 days

   - Establishes different roles like Admin, Donor, and Volunteer with distinct permissions.

   - Admin has access to user management, grant requests, and content management, while volunteers have limited access to manage grant requests.

   - Designs a responsive dashboard layout for Admins, Donors, and Volunteers, each tailored to their specific roles and privileges.

   Uses technology : React, Tailwind CSS, Express.js, Node.js, MongoDB.

   Git link client site: https://github.com/SHOJOL-ISLAM-77/On-Blood-For-All

2. **Service Swap Hub** — *(offline service sharing site)*
   Project duration — 5 days

   - Use JWT for back-end security.

   - Allows users to add their own services to the platform. Users can delete or update their listed services.

   Uses technology : React, Tailwind CSS, Express.js, Node.js, MongoDB.
